Sume's variable leg styles are definitely something that brings some color and shape to the urban space. But what really makes you dance is the soft and flexible seat of Sume. Placed together Sume forms a socially entertaining atmosphere, a little corner on the street that attracts invitingly in the middle of everyday gray and harsh rigidity.

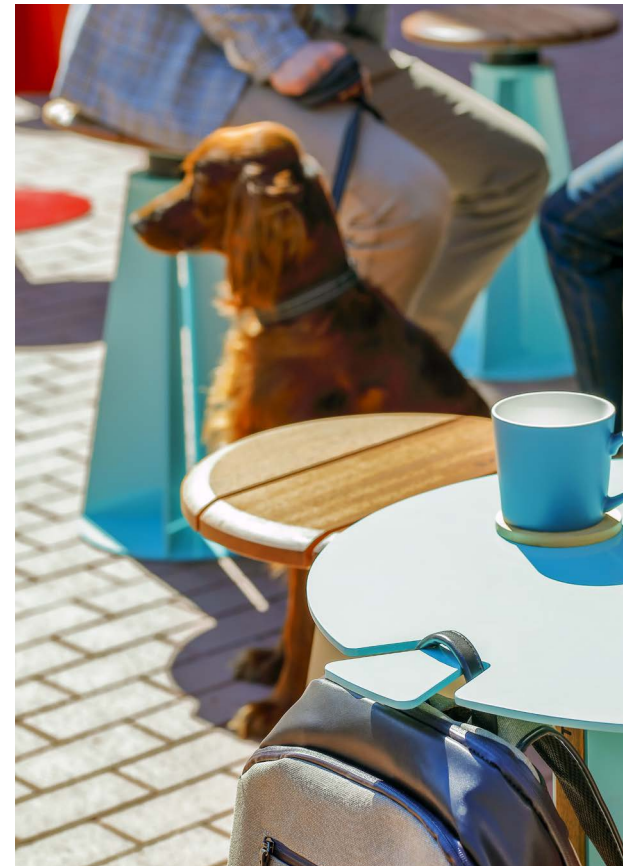

The alternating use of Sume leg shapes allows you to create playful and inspiring areas for spending time and being together. Seats can be assembled in one shape style or as combinations from different shapes. By adding Sume tables you can create characteristic outdoor areas or clusters of outdoor offices instead.

Sume table surprises with its simplicity and functionality. The principle of the table is extremely simple but the small design elements make the table distinctive and elegant.

Take your time, sit down, spread your stuff on Sume's table and hang the bag on the rod - unobtrusive but necessary. Not much is needed for a happy moment.
